- Pyhton
- HTML
- CSS
- Java Script
- UI & UX Design
- Node.js
- SQL
- Bootstrap

🧩 LANGUAGES

- English
- Tamil

🪪 PROFILE

An ambitious final-year Computer Science Engineering student skilled in web development technologies such as HTML,CSS,JavaScript, Node.js. Seeking to apply my knowledge and passion for software development to contribute to the company's growth while continuously advancing my skills.

📂 PROJECTS

Mini project

Music recommendations system using face detection

It is a web-based music recommendation app using HTML, CSS, JavaScript, and Flask to suggest songs based on facial expressions.

Projects

Smart water irrigation system

The Smart Water Irrigation System with ESP32 automates watering based on soil moisture levels. The ESP32 reads data from soil moisture sensors and activates irrigation only when needed.

Voting application using Fullstack Django

Develop a voting app with Django for creating polls, casting votes, and viewing results. It features user authentication, models for managing polls and votes, and dynamic templates to display voting options.

🗄 INTERNSHIPS CERTIFICATE

Web Design using HTML,CSS,JS
Phoenix softech
July-August 2024

Node.js
Pantech ProEd Pvt ltd
July -2024

🧩 AREA OF INTREAST

- Web Designing
- UI & UX Design
- Software Development
